Abstract (en)
[origin: WO2010050691A2] A method of processing images, the method including determining whether metadata for generating a depth map corresponding to a predetermined title exists for each of a plurality of titles recorded in a disk by using metadata for disk management, and including converting two-dimensional (2D) images in the predetermined title to three-dimensional (3D) images by using the metadata for generating the depth map if metadata for generating the depth map corresponding to the predetermined title exists.
