Abstract (en)
[origin: EP2319384A1] The system comprises a dish washer (2) with a washing tub (3), a sensor and a control device (13). A metering unit comprises a store from which a number of washing auxiliary portions, are metered one after the other in the washing tub. A sensing component is arranged at the store or at the washing auxiliary portion. A signal of the sensor, is identified by the control device, where the holding units are arranged in the washing tub. An independent claim is also included for a method for cleaning the dishes.
