Abstract (en)  
[origin: EP2319988A2] The rear-mounted device (1) for a snowcat, comprises a milling shaft (5) inclined according to a housing longitudinal axis (L) of a milling body. An inclined position of a cutting teeth (6) is obtained, where the cutting teeth is provided for obtaining a towing operation of a driving snowcat. Multiple milling shafts are aligned towards each other in a mirror-symmetrical manner.
