Abstract (en)

[origin: EP2320062A1] The injection valve comprises a valve seat support (11) having a valve seat (16), where the valve seat support is manufactured as a single component with two areas (91,92). The valve seat support is formed of a magnetic material in one area. The valve seat support is formed of a non magnetic material in another area. An independent claim is also included for a method for producing an injection valve.
