Abstract (en)

[origin: EP2320186A2] The device comprises a stationary container (1,2) which forms an annular flow channel in a sieve for the goods. The flowing channel has goods outlet (7) for the processed goods, where a collection chamber (8) is arranged between the sieve and a container cover (3,4). A blower is provided for a cleaning and drying air flow for the goods by a suction duct.
