Abstract (en)

[origin: EP2320408A1] The dot (20) has two sets of cuts (28, 30, 32) provided on three parallel lines. One of the parallel lines coincides with a theoretical folding line. Other two parallel lines are arranged at equal distance from the theoretical folding line. The sets of the cuts are arranged along an axis passing through the theoretical folding line proximal to an outer edge of the dot. A central cut line coincides with the theoretical folding line.
