Abstract (en)  
[origin: EP2320623A1] The method involves transmitting payload data toward a browsing module i.e. browser (NAV), and selecting a part of received payload data. The selected payload is transmitted to a service (SRV1). A service access demand is transmitted to a destination of another service (SRV2) by the browsing module, after receiving the access data. Authentication data is exchanged between the browsing module and the service. Independent claims are also included for the following: (1) a device for processing data (2) a computer program comprising instructions for executing a method for utilizing a service from a browsing module.
