Abstract (en)

[origin: WO2010011704A1] An integrated closure feature for a package including a tab (25) integrated into the raised surface of a vaulted carton and an outer cover secured to the carton possessing a pocket into which the tab fits, providing a secure lock for the package. The package is capable of housing and dispensing a unit dose product such as a blister pack. The product to be dispensed is contained on an internal slide card (300) that is removably and lockably engaged within an inner chamber. The package possesses a secure lock which provides a child resistant and user-friendly dosing means that can be opened and closed numerous times while in use, then disposed of when all the unit doses are exhausted.
