Abstract (en)
[origin: EP2322060A1] The system has a lower mattress (14) comprising supporting elements (17) aligned transverse to longitudinal beams. The supporting elements have holding units into which strips (27) are inserted. The strips are aligned parallel to the supporting elements, and form contact surfaces (28) for a mattress (2). The mattress has a core (1) comprising core elements (8a-8c) of different hardness. Each core element is formed from a prismatic-shaped body that extends over entire breadth of the mattress, where breadth of the body corresponds to breadth of a region of the contact surfaces.
