Abstract (en)  
A tool (4) is provided for use in combination with a paint roller of the type comprising a hollow grip (1), a support bar (2) for a rotatable brush (3), said support bar (2) having a first end connected to the grip (1) and a second end extending substantially perpendicularly to the grip (1), and a rotatable brush (3) rotatably and removably supported by said second end of the support bar (2). The tool (4) has outer dimensions allowing it to be received clampingly within the hollow grip (1) of the paint roller and being provided at its circumference with a recess (5) with a width larger than the diameter of the support bar (2). The tool further may have a forked end with two spaced fork members (7,8).
