Abstract (en)

This box is of the type that has at least two hollow bodies (1), that can be fitted to each other to form a closed housing and one that is accessible for opening by means of some hinging and latching means. At least one of the bodies (1) is made up of an inner shell (11) and an outer shell (11) that are joined by some intermediary means and is provided with some openings (12) into which a music player (2) is fitted that is accessible from the outer or inner face of the body and at least one speaker (3); these speakers (3) facing outwards through some openings or grilles (13) for the distribution of the sound, and said music player (2) being arranged in such a way that the controls for same are accessible from the outside of the box.
