Abstract (en)  
The container has a base body i.e. injection molded plastic part, comprising a projecting upper edge (206) and a lower edge at corner regions (100) of the body. A hollow chamber profile (110) made of plastic is attached to the base body between upper and lower edges in a material-fit manner. The upper edge forms a stacked surface, and base-shaped stacked elements are arranged at the lower edge of the base body. The profile is made of same plastic as the base body or compatible plastic. A radio frequency identification chip is arranged in the profile, where the container is made of plastic. Independent claims are also included for the following: (1) a system comprising a stackable plastic transport and storage container (2) a method for manufacturing a plastic transport and storage container.

Abstract (de)  
Stapelbarer Transport- und Lagerbehälter aus Kunststoff mit einem Grundkörper zur Aufnahme eines Gutes, wobei es sich bei dem Grundkörper um ein Kunststoffspritzgussteil handelt, wobei der Grundkörper an seinen Eckbereichen (100) einen vorspringenden oberen (206) und unteren Rand aufweist und zwischen dem oberen und unteren Rand je ein Hohlkammerprofil (110) aus Kunststoff an dem Grundkörper befestigt ist.
