Abstract (en)  
[origin: EP2322711A1] The material has a visible side and a rear side, where the visible side forms a front side. The visible- and rear sides have coatings (5) made of polyurethane. The coating in the visible side has smaller dry mass than the coating of the rear side based on dry mass of the polyurethane in gram per square meter. The material contains R-glass, M-glass, corrosion resistive E-glass (ECR-Glass), D-glass, alkaline resistant (AR)-glass, E-glass, C-glass and fibers e.g. polyester-, Kevlar(RTM: Para-aramid synthetic fiber)- and carbon fibers. An independent claim is also included for a method for producing a flat, textile glass fiber material.
