Abstract (en)

[origin: EP2322732A1] The facade or glass wall comprises an external hollow body (2) and an internal hollow body (3), which is surrounding an intermediate space. A bar is provided, which extends from the outer surface of the wall of the internal hollow body into the intermediate space in the longitudinal extension of the profile. The internal hollow body of a post profile (301) and the internal hollow body of a locking profile (302,303) receive an attaching and connecting unit (305).
