Abstract (en)
The present invention concerns a support (13) adapted to bear one or more flooring elements, which comprises a body (26) with a bearing surface (16) that, in operation, has a substantially horizontal orientation, to support a bottom face (17) of a flooring element (12), said body (26) having one or more coupling elements (14) designed to be fitted into corresponding seats (18) formed in said bottom face (17) of the flooring element (12) when the latter is supported by the support (13). These coupling elements (14) have at least one frustoconical portion (15) adapted to cooperate, in operation, with a corresponding frustoconical portion (22) formed in said seat (18) of the flooring element.
