Abstract (en)

[origin: EP2322889A1] The device has a support unit (8) provided at a retaining bar (4), where the support unit comprises a retainer (10) for enclosing an anchor stone. A fastening unit i.e. set screw (6), holds the anchor stone in the retainer. The fastening unit is made of a material i.e. plastic, which melts at a temperature of an area of the device during operation of a furnace i.e. heating furnace. A plate is suspended into the retainer. The plate is made of the plastic and arranged between the set screw and the anchor stone.
