Abstract (en)

[origin: EP2323269A1] A high-frequency switch module (1) includes a switch element (SW1), high-frequency circuits (2 to 6), and a GND circuit (7). The switch element (SW1) includes an antenna port (Pa1), switch ports (Ps1 to Ps6), and an FET switch. The FET switch switches connection between the switch ports (Ps1 to Ps6) and the antenna port (Pa1). The high-frequency circuits (2 to 6) connect any of the switch ports (Ps1 to Ps6) to a signal processing circuit. In the GND circuit (7), the switch port (Ps6), which is not connected to the high-frequency circuits (2 to 6), is directly connected to a GND electrode.
