Abstract (en)

[origin: WO2010010015A1] The invention relates to a water-conducting household appliance, in particular a dishwasher or washing machine, designed to carry out at least one washing program (I, II, III), especially a low-temperature program. According to the invention, a special cleaning program (S) for cleaning the washing container (1), particularly by applying washing liquid thereto, is carried out when there is a start signal (SV).
