Abstract (en)  
[origin: WO2010018077A1] A blister pack comprises a bottom film and a top film for forming a plurality of film containers (1) which can be separated from one another by perforations (10) and each have an accommodating chamber (2) for a filling, in particular a pharmaceutical active substance formulation, wherein the accommodating chambers (2) are arranged on the periphery of the blister pack (7). The centre of the blister pack (7) is formed by a film portion (4) which can be separated out from said blister pack, and the removal of this film portion leaves an opening region (5) for opening the accommodating chamber (2).
