Abstract (en)

[origin: WO2010028690A1] There is provided session initiation for device-to-device communication using a local address format, which exemplarily comprises creating an address of a destination device for device-to-device communication to be of a local address format, creating a session initiation request for device-to-device communication using the detected local address format of the destination device, and sending the created session initiation request on a control plane to a local network node.
