Abstract (en)

[origin: EP2325107A1] The package (2) has a set of panels (12), base strips (14) i.e. foot strip, and fastening units e.g. clips, for the base strips packed in a packet (4). The base strips are adapted to the packed panels, where the ratio of total length of the packed base strips to the total surface area of the packed panels lies between 0.5 and 3 m/square m. The packet has two areas (8, 10) that are separated from each other by packaging material. The panels are arranged in the former area (8), and the base strips are arranged in the latter area (10).
