Abstract (en)

[origin: EP2325116A1] The device comprises cuts (3), which have an interchange point (6). The cuts are transportable over a supply level (10) toward the interchange point. The supply level forms a pointed angle (Beta) with a horizontal running level (16). The supply level rises to the interchange point. A feed unit (7) is provided, which forms the cuts at the interchange point.
