Abstract (en)
[origin: EP2325132A1] The device has a supporting structure (2) defining supporting surfaces (3, 4) for supporting a load (1) and for forming right angle between them. One of passages (12) of a fork (20) is connected to free end of L-shaped branches to permit displacement of the structure from horizontal storage position to vertical storage position or vice-versa of the load using the supporting surfaces.
