Abstract (en)

[origin: EP2325373A1] The machine (1) has a body (2) enclosing a washing tank. A rinsing and/or washing water reservoir (5) is fixed on an outer surface of a wall of the body. The reservoir comprises recesses (11) for passage of water flowing pipes (6, 7, 8, 17) such that the water flowing pipes are arranged inside an envelope of the reservoir. The water flowing pipes are placed between the wall of the body and the reservoir. One of the water flowing pipes allows flow of rinsing and/or washing water from the tank toward the reservoir and vice versa.
