Abstract (en)

[origin: EP2325418A2] The arrangement has a cold-formed metal profile (1) provided as a fence post for attaching fence fields (2a, 2b) at an upper fastening section (3). A lower anchoring section (4) is attached at the upper fastening section and is fixed at or in floor (5). A screw channel (6) is molded as a self-grooving screw in the metal profile along the upper fastening section. A clamp is formed as a fastening unit for the fence fields. The metal profile is provided with a single-layer envelope made of a corrosion-resistant plastic material e.g. polyethylene or PVC.
