Abstract (en)

[origin: WO2010031975A1] The invention relates to packages for edible products provided with a basically flat wall (15) and an orifice (13). The package is provided with an opening and closing device (1) comprising an integrally moulded body (2) attached to the wall (15), this body (2) having a plate (20) containing a hole (30) facing the orifice (13) and attached to the edge (19) of the orifice (13) in the wall (15) in a leaktight manner, and a door (40) hinged to this plate (20), opening into the package, and designed to seal this hole (30) shut, and in that it also comprises an arm (50) connected to the door (40), the arm (50) engaging with means of immobilization in a position such that it keeps the door (40) in the sealed-shut position.
