Abstract (en)

[origin: WO2010020635A2] Active 3D-measuring system (10) comprising a lens (12) for stripe light projection; a video camera (14) with analog video output; an analog operational amplifier circuit (16) which is designed so that it detects points (30) with high gray scale gradients in the analog video signal; and a microcontroller (18) which is designed such that it determines depths to the detected points (30).
