Abstract (en)

[origin: EP2327319A1] The article i.e. protective gloves, has a metal ring network (12) comprising metal rings that are interlocked with each other. A holding element i.e. metallic articulated band (10), is provided for holding of the article at a body of a user. The holding element is connected with the metal ring network and arranged at a body sided end of the article. The holding element is connected with the article along a portion of one of longitudinal sides (10a) of the holding element, and other longitudinal sides (10b) of the holding element is folded over the article, in a fixed usage condition.
