Abstract (en)
Display case (1) comprising at least one glass panel (2) and a connection element (3) fixing the glass panel (2) into the remainder of the display case (1), the connection element (3) comprising a first flange (4) with a first longitudinal surface (9) attached to the inner surface (14) of the glass panel (2) and extending along at least one of the delimiting sides of the glass panel (2) and a second longitudinal surface (10) opposing the first longitudinal surface (9) of the first flange (4) and a second flange (5) extending away from the glass panel (2) and having a third longitudinal surface (11) adjacent to the second longitudinal surface (10), the first (4) and the second flange (5) cooperating for fixing the glass panel (2) into the remainder of the display case (1), characterised in that the display case (1) comprises a positioning element (13) contacting the second (10) and third (11) longitudinal surface such that the connection element (3) at least partly positions the glass panel (2) with respect to the remainder of the display case (1).
