Abstract (en)
When marking on a material to be worked, both an operation of grinding and cleaning and an operation of marking are carried out at a time. A marker for grinding and cleaning for forming marks on a ground and cleaned part while grinding and cleaning a surface of the material (C) to be worked includes a carrier (1) structured to be movable in a desired direction, a marking member (A) and a grinding and cleaning member (B) mounted on the carrier (1) and separately located from each other, the grinding and cleaning member (B) or the marking member (A) structured to be rotatable with respect to the marking member (A) or the grinding and cleaning member (B) as reference, and a rotating device (5) for rotating the grinding and cleaning member (B) or the marking member (A) structured to be rotatable.
