Abstract (en)

The invention relates to an arrangement for removing oil from a shoe press in a fiber web machine. The shoe press includes a fixed beam (10) and a loading shoe (11) arranged movably on the beam (10). The shoe press further includes a flexible belt (13) interacting with the loading shoe (11) and an oil removal equipment (17) with an inlet opening (18), which is arranged close to a closing nip (19) formed by the loading shoe(11) and the belt (13). The arrangement includes a wipe (21) arranged in connection with the oil removal equipment (17) and adapted in contact with the inner surface of the belt (13) for collecting particles to the inlet opening (18). The invention relates also to method for removing oil from a shoe press in a fiber web machine.
