Abstract (en)
The kitchen hood unit (10; 110; 210; 310; 410) comprises an actual hood (14; 114) overlying a cooking hob, and suspension means (22; 122) for suspending it from a support element (12; 112; 212; 412) to be fixed to the ceiling of the room in which the hood unit (10; 110; 210; 310; 410) is located. The suspension means (22; 122) have a length which can be varied by the user to cause the actual hood (14; 114) to approach and withdraw from the cooking hob. A fume evacuation conduit (28) can also be provided, the length of which varies on the basis of the variation in length of the suspension means (22).
