Abstract (en)
[origin: EP2328238A1] The device (1) has a housing (3), and a power supply line socket including a connection device for a power cable. A receiving opening (11) exchangeably receives a data line socket with a data interface. The housing comprises a housing part (5), which encloses the power supply line socket and the connection device and is spatially separated from the receiving opening and the data line socket received in the receiving opening. The housing comprises another housing part (7) into which the receiving opening is arranged.
