Abstract (en)

[origin: WO2010031689A1] An aqueous cleaning agent for hard surfaces which contains at least one fatty acid or a salt thereof and at least one alkylamido alkylamine can be used after dilution for cleaning hard surfaces. The agent can accordingly be used in a method for cleaning hard surfaces which comprises the steps of preparing a cleaning liquor by diluting the cleaning agent with water, applying the diluted cleaning agent to the surface to be cleaned, wiping with a cloth, a sponge, a leather or some other substrate suitable for this purpose in order to distribute the agent over the entire surface and leaving it to dry.
