Abstract (en)

[origin: WO2010029252A1] The subject of the invention is an orientable panel for the creation of a roofing device, comprising a profile (12) made of translucent material that has a length L1 and a longitudinal axis A1 about which said panel (10) is pivotably connected, and at least one blade (14) made of opaque material that has a length L2 which is not longer than L1 and longitudinal axis A2 which extends parallel to A1 and about which said blade (14) is connected to be pivotable in relation to said panel.
