Abstract (en)

[origin: WO2010026346A1] The invention relates to a cell clone from the MovS6 cell line, said cell clone expressing a prion protein PrP and being capable of supporting the replication or the propagation of the pathological form PrPsc of said Prp, characterized in that it has a titer stability to at least the sixth passage in a marker for infection by a non-conventional transmissible agent (NCTA).
