Abstract (en)  
[origin: WO2010018117A1] Seal (1) comprising a flexible strip (2), a body (3) arranged at one end of said strip, a housing (4) arranged in said body, a piece (7) that is arranged inside the housing, means for fixing the piece inside the housing, and some holes (6, 9) through said housing and said piece, respectively, that are aligned when the piece is arranged inside the housing, so that the other end of the strip passes through said holes (6, 9) for locking said seal, the position of said strip being locked by means of locking means (13) that are present in the piece. The means for fixing the piece inside the housing comprise at least one welding area (20) between the inner surface of the housing and the outer surface of the piece.
