Abstract (en)
[origin: EP2329864A2] The jaw has a support structure (1) connected with a ski, and sole holders (6) for holding a skishoe. The holders are movably connected with the structure about a rotational axis (Z) in joints. The joints are formed by joint elements (5) of the structure and joint elements (4) of the holders. The holders are movable in the joints against spring force of a spring mechanism (16). The structure is formed as a frame structure with a frame base (11), a right frame side structure (10r) and a left frame side structure (10l).
