Abstract (en)

[origin: EP2330041A1] The device (1) has a clamping device which contains multiple finger elements (5) which are inserted in a label sleeve. The finger elements are movable relative to each other for applying the label sleeve. The finger elements contain a flexible material and the label sleeve and the label sleeve is clamped through a container (2) attached on the finger elements. An independent claim is also included for a method for applying label sleeve on a container.
