Abstract (en)

[origin: EP2330051A1] The invention relates to a tray obtained by moulding, manufactured using biodegradable material, based on cellulose and additives, and having a series of scrapers that can be separated from one another, in which each scraper has a grip or handle, and a scraper or actuating and cleaning end, each joined to one another by an intermediate section, having a general concave configuration that allows stacking the trays or the scrapers once separated, the scrapers being used to clean those objects or devices on which organic or any other nature of waste may be deposited.
