Abstract (en)  
[origin: EP2330566A2] The locking system has a transmission device (12) of a remote control unit (11) formed as transmission and receipt device and a deactivation signal beside the transmitted channels (S1,S2) of a receiving channel (E) for an activation signal. The former transmitted channel activated or deactivated as a function of received activation signal or deactivation signal. An independent claim is also included for a method for operating locking system.
