Abstract (en)  
[origin: WO2010029128A1] A packaging unit (13) comprises a blister unit (1) comprising cavities (5) forming take-up chambers (6) for accommodating a fill material, in particular a pharmaceutical active ingredient formulation, and a support unit (7) that supports the blister unit (1) and removably connected thereto, said support unit having a size that corresponds to the blister unit (1). The blister unit (1) comprises at least one locking opening (3) and the support unit (7) forms a support bowl (12) that peripherally grips the blister unit (1) with a raised edge (8), at least one fastening element (10a, 10b) of said support bowl protruding from the base surface (9) thereof and engaging into the locking opening (3) and holding the blister unit (1) removably clamped in the support bowl (12).
