Abstract (en)  
[origin: WO2010040440A1] The invention relates to a phase adjusting device, particularly a valve train phase adjustment device, having a phase adjusting unit (10) comprising at least one housing part (11), a drive (12), and an output that can be phase adjusted relative to the drive (13), and having a control actuator connecting unit (14) provided for disposing a base unit (15) of a control actuator unit (16) at least partially in the housing part (11).
