Abstract (en)

[origin: WO2010037933A1] The invention relates to an ejector (5) to be mounted in an air-conditioning circuit of a ventilation, heating and/or air-conditioning system of an automobile. The ejector (5) includes a coolant receiving nozzle (17) comprising a convergent portion (18) with a convergence length A and a divergent portion (19) with a divergence length B as taken in the general extension direction ? of said ejector (5). The convergence length A is larger than the divergence length B.
