Abstract (en)

[origin: EP2332443A1] The applicator has an application component carried by a rod, and provided with a support (10) having a rectilinear inner arm (11) and a rectilinear outer arm (12), where the support is formed as a single piece. The application component has an applicator part (20) partially engaged between the inner and outer arms. The applicator part is extended, on a portion of its length where the applicator part is engaged between the inner and outer arms, all around the inner arm. The applicator part is made of elastomer material, or is formed by foam, felt or ceramic sleeve. An independent claim is also included for a device for applying a product on eyelashes and/or eyebrows.
