Abstract (en)

[origin: EP2332458A1] The insert i.e. table ware basket, has a holding device (1) holding a hollow container, and exhibiting a holding part that is guided into the container and a plastic clamping part i.e. holding frame (3) that is fixed at the basket. The holding part is fixed at the clamping part. The holding part is designed as a long elongated bracket (2) i.e. plastic encased wire loop. The bracket is held in a swivelable manner between a function position, in which the bracket is positioned from a rack level of the insert, and a resting position, in which the bracket is turn down in the rack level.
