Abstract (en)

The invention concerns a counter-frame structure for door/window frames, suitable for insertion in an opening in an external wall or roof of a building, consisting of a counter-frame (10) for a door/window frame and an insulating surround (12) in a heat insulation material which encloses the counter-frame at least on the sides facing the said wall and towards the exterior of the building, where the said counter-frame and insulating surround are interconnected in such a way as to form a single block (1; 2) to be inserted in the opening in the wall.
