Abstract (en)  
A frame (1) for casings or the like, comprising a framework (2) which has a closed extension and can be fixed around the edge of an opening (3) which is formed in a wall (4) of a building and is provided with sealing means (6) designed to operate between the framework (2) and the outer side of the wall (4). In the upper part (2a) of the framework (2), there is at least one port (7) for draining the water that has penetrated through the sealing means (6), the at least one draining port (7) being connected to at least one water conveyance channel (8), which extends inside the framework (2) and opens into at least one discharge port (9), which is formed in the lower part (2b) of the framework (2) and is connected to the outside.
