Abstract (en)  
[origin: EP2333225A2] The box (1) has a self-supporting insulation with two front side walls (4) that are made of wood. The walls are parallel to each other to receive a roller shutter mechanism. An inner plate (5) is connected to the side walls in right-angled manner. A lower support plate (6) is connected to the side walls and the inner plate in a right-angled manner. An end base is connected to the inner plate in a right-angled manner and arranged parallel to the lower support plate. The inner plate and the lower support plate are made of polyurethane plates and/or phenolic foam boards or resol foam plates. An independent claim is also included for a roller-type shutter arrangement comprising a roller-type shutter axle.
