Abstract (en)
The element (5) has a single-piece plate comprising transparent and opaque plate areas, where the plate is made from two layers (1, 2) that are connected with one another by using an injection-molding method. One of the layers is designed in a transparent manner, and the other layer has partially-opaque areas. The layers comprise thickness of 0.5 mm, and display elements and/or symbols are arranged between the layers. Constructive elements designed in the form of lugs are provided for fastening the surface element to a front side of a household appliance. An independent claim is also included for a method for manufacturing a display surface element.

Abstract (de)
Das Anzeigeflächenelement (5) besteht aus einer einstückigen Platte, die transparente und opake Plattenbereiche aufweist. Erfindungsgemäß ist vorgesehen, dass die Platte aus mindestens zwei miteinander innig verbundenen Schichten (1, 2) gleichartiger Beschaffenheit gebildet ist, von denen mindestens eine Schicht (1) transparent ist und eine zweite Schicht (2) zumindest teilweise opake Bereiche aufweist.
